PROJECT UPDATE #18

Progress continued this week, as Eastern Iowa had a crew on site at Sunset Drive at the beginning of the week to finish the placement of aggregate base in preparation for subbase trimming. The crew also spent their time removing remaining driveways ahead of the paving process.

Eastern Iowa had a crew on site at Springreen Drive all week working on the final placement and grading of topsoil throughout the project corridor. Upon final placement and grading of topsoil, Eastern Iowa's crew hydro-seeded the site. A seeding notice was delivered to property owners along Springreen Drive with some information regarding turf establishment and watering.

As of now, the plan for next week is to start trimming the subbase at Sunset Drive at the beginning of the week. Paving is set to begin on Thursday of next week. A paving notice providing more information on what to expect during paving was delivered to residents along Sunset Drive today.

For those who live and travel throughout the project corridor on a regular basis, please use caution around the ongoing construction. Eastern Iowa, and their subcontractors, may have multiple crews working at any given time. If you have questions throughout construction, please do not hesitate to contact Nate Stevenson with MSA at any time.
